## Step-by-Step Getting Started Guide

FTBP Ai

# WHAT IS ALGO-TRADING?

**Algorithmic Trading / Algo-Trading** means that an intelligent trading algorithm automatically trades for you. This type of trading software is also called EA (Expert Advisor). You don't need to analyze charts, make your own decisions, or invest time.

**No chart analysis  
or time investment needed**

**Trade without emotions or  
human errors**

**Real strategies with clearly defined  
rules**

**Bot opens and closes trades  
fully automatically**

**Trade without experience like  
a real pro**

**REGISTRATION LINK**

# FTBP AI

Trading bot is a fully automated trading bot for MetaTrader 5 that exclusively trades the gold market (XAU/USD).

It analyzes specific price ranges daily and strategically places Buy or Sell-Stop positions. As soon as the market reaches the set level, the position is automatically opened and secured with a fixed Take Profit and Stop Loss. Additionally, intelligent trailing stop logic is used to secure profits optimally. You don't have to do anything manually – the bot works completely independently.

# WHY IS OUR TRADING BOT FREE?

We get this question very frequently and the answer is quite simple. Whenever you want to trade in the Forex market, you need a broker. A broker is the platform that enables your access to the financial market and executes your trades. Whether you trade Forex, Crypto, or stocks.

## HOW IT WORKS

Every time our trading bot executes a trade, the broker charges a minimal 'spread fee', a fee that you would pay with any broker anyway. However, if you register through our partner link, the broker shares a small part of this fee with us.

- ✓ You pay not a cent for our bot
- ✓ You pay no license fees
- ✓ You pay no profit share
- ✓ You keep 100% of your profits

**REGISTRATION LINK**

# A REAL WIN-WIN-WIN SITUATION

**We have partnered with one of the best and most strictly regulated Forex brokers in the industry.**

**Our motivation to provide you with a really strong and profitable trading Tool is extremely high.**

**Because we only profit from this offer if you trade successfully in the long term.**

**Your Success = Our Success**

**Why pay hundreds of euros for a trading bot when you can use one of the best automated FX trading tools on the market completely free? A REAL WIN-WIN-WIN SITUATION**

# STEP 2:

## VPS Server Setup

**If you already use a VPS server, you can skip this step completely and continue directly with Step 3.**

# What is a VPS Server?

**A VPS (Virtual Private Server) is like a second computer that is always online, even when your own PC/laptop is turned off! It is accessible from anywhere in the world.**

**Why is this important when trading with an Expert Advisor?**

**The EA needs a permanent internet connection to work smoothly and execute trades.  
With a VPS, it runs without interruption**

**Your own PC can be turned off or used for other things while the VPS continues working in the background.**

**In short: A VPS ensures that your trading bot can work 24/7 without you having to worry about anything!**

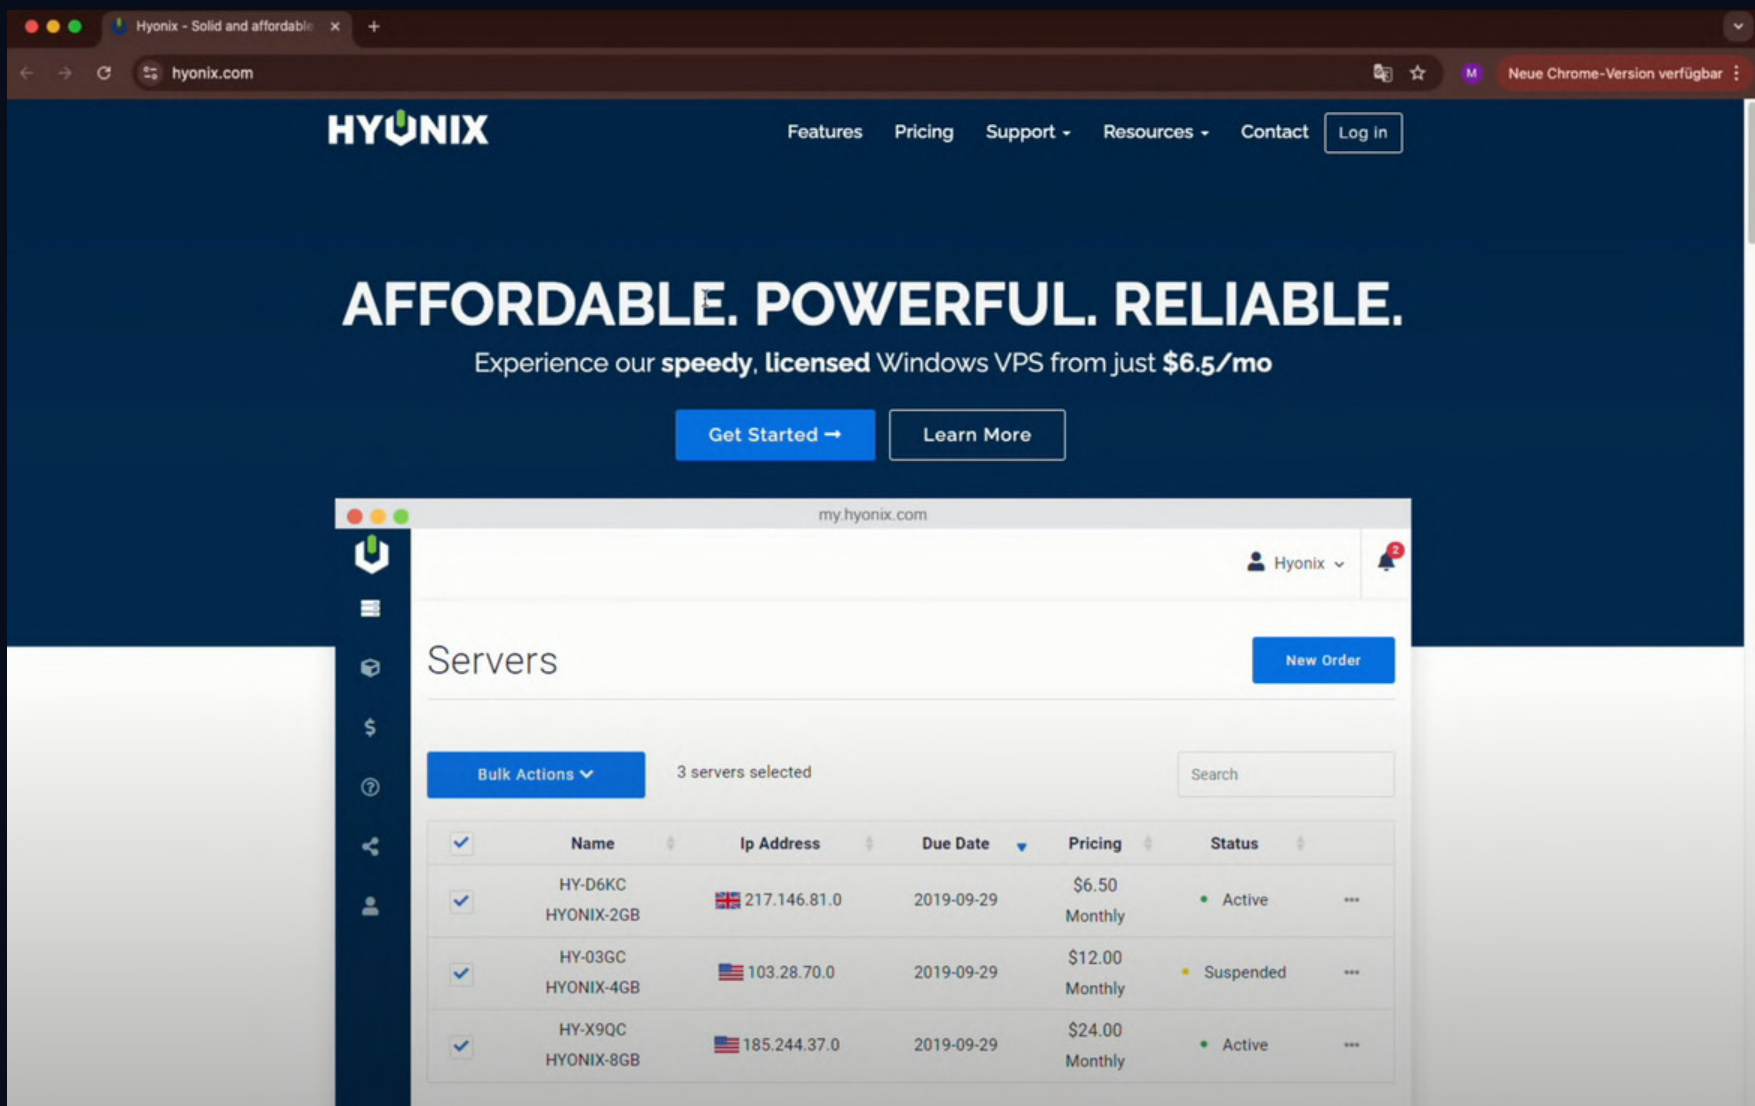

**If you don't want to use a VPS, you can also run the EA on your own computer/laptop – however, note that it must always be turned on during trading hours.  
A VPS is therefore not mandatory, but highly recommended to get the best out of your automated trading.**

# Our Recommendation: Hyonix VPS

We recommend the provider Hyonix – a very affordable and reliable VPS service provider.

**Cost: \$6.50/month (€5.70)**

*You can also use any other VPS provider you prefer.*

The screenshot displays the Hyonix website and its user dashboard. The website header includes the Hyonix logo, navigation links (Features, Pricing, Support, Resources, Contact), and a 'Log In' button. The main banner features the text 'AFFORDABLE. POWERFUL. RELIABLE.' and 'Experience our speedy, licensed Windows VPS from just \$6.5/mo', with 'Get Started' and 'Learn More' buttons. The dashboard, accessed via 'my.hyonix.com', shows a 'Servers' section with a 'Bulk Actions' dropdown and a 'New Order' button. A table lists 3 servers selected:

|                                     | Name                  | Ip Address   | Due Date   | Pricing            | Status    |
|-------------------------------------|-----------------------|--------------|------------|--------------------|-----------|

# Login in VPS (Windows Version)

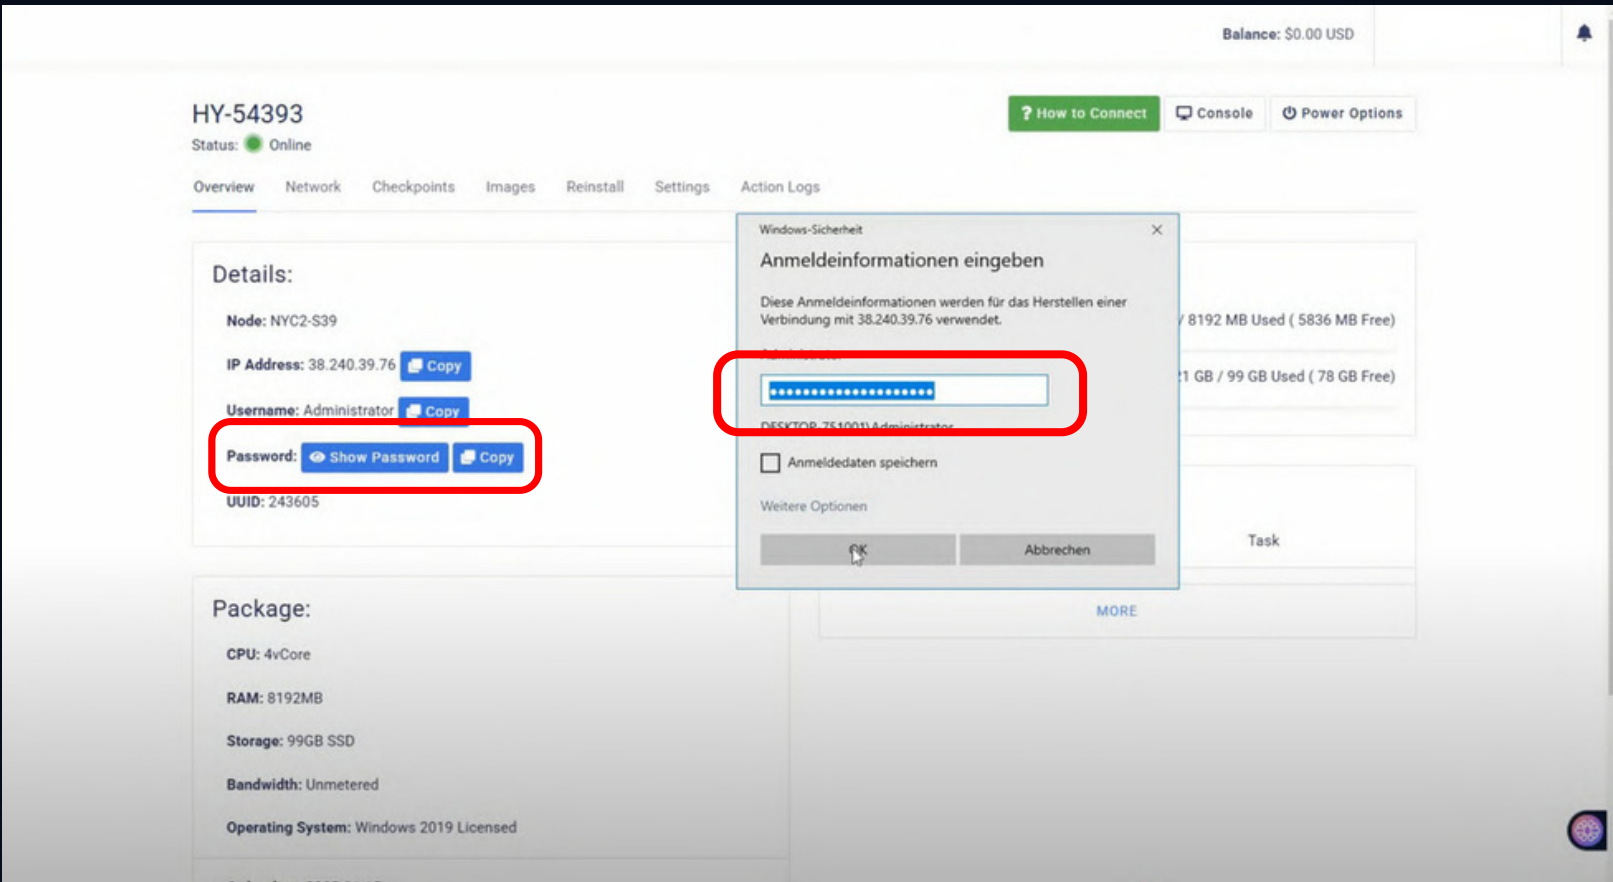

The search bar might be positioned differently depending on your Windows PC, but the process is the same.

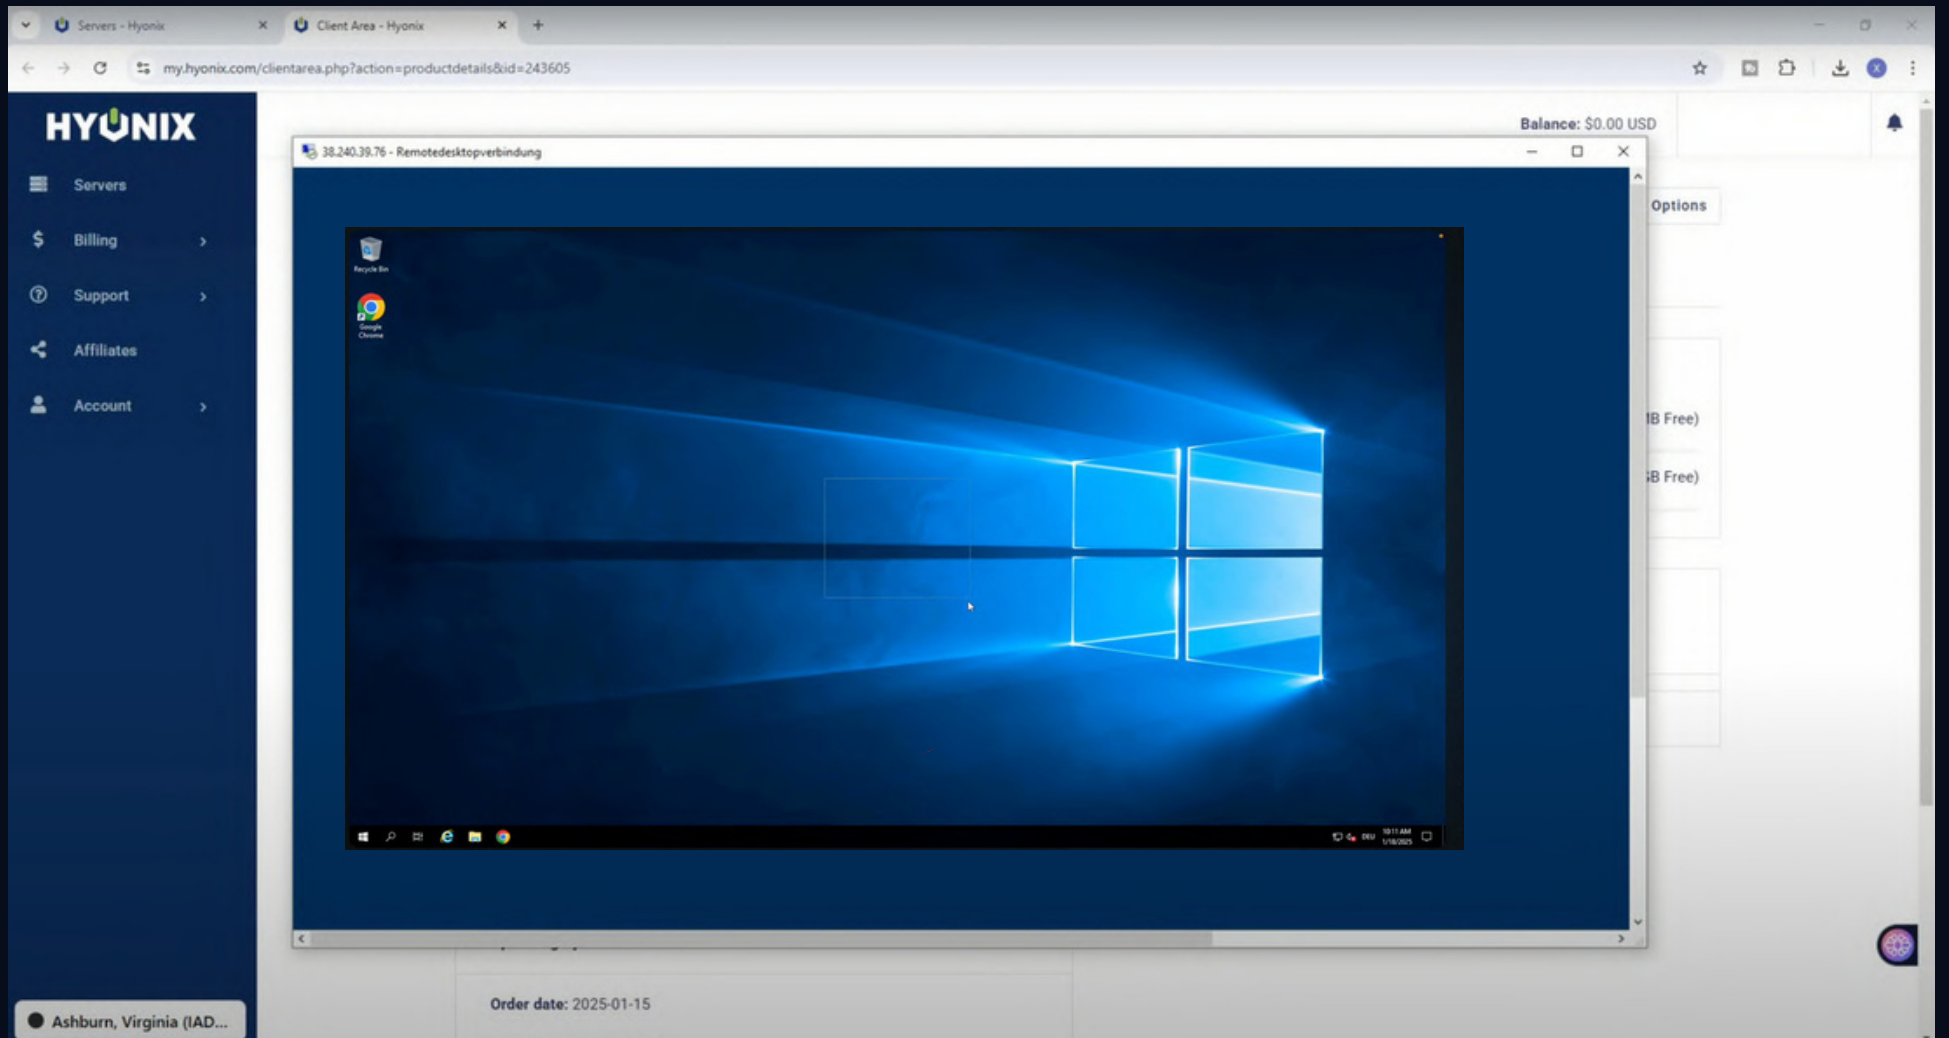

# Computer: IP address of your VPS

# Paste the password from Hyonix using 'Copy & Paste'.

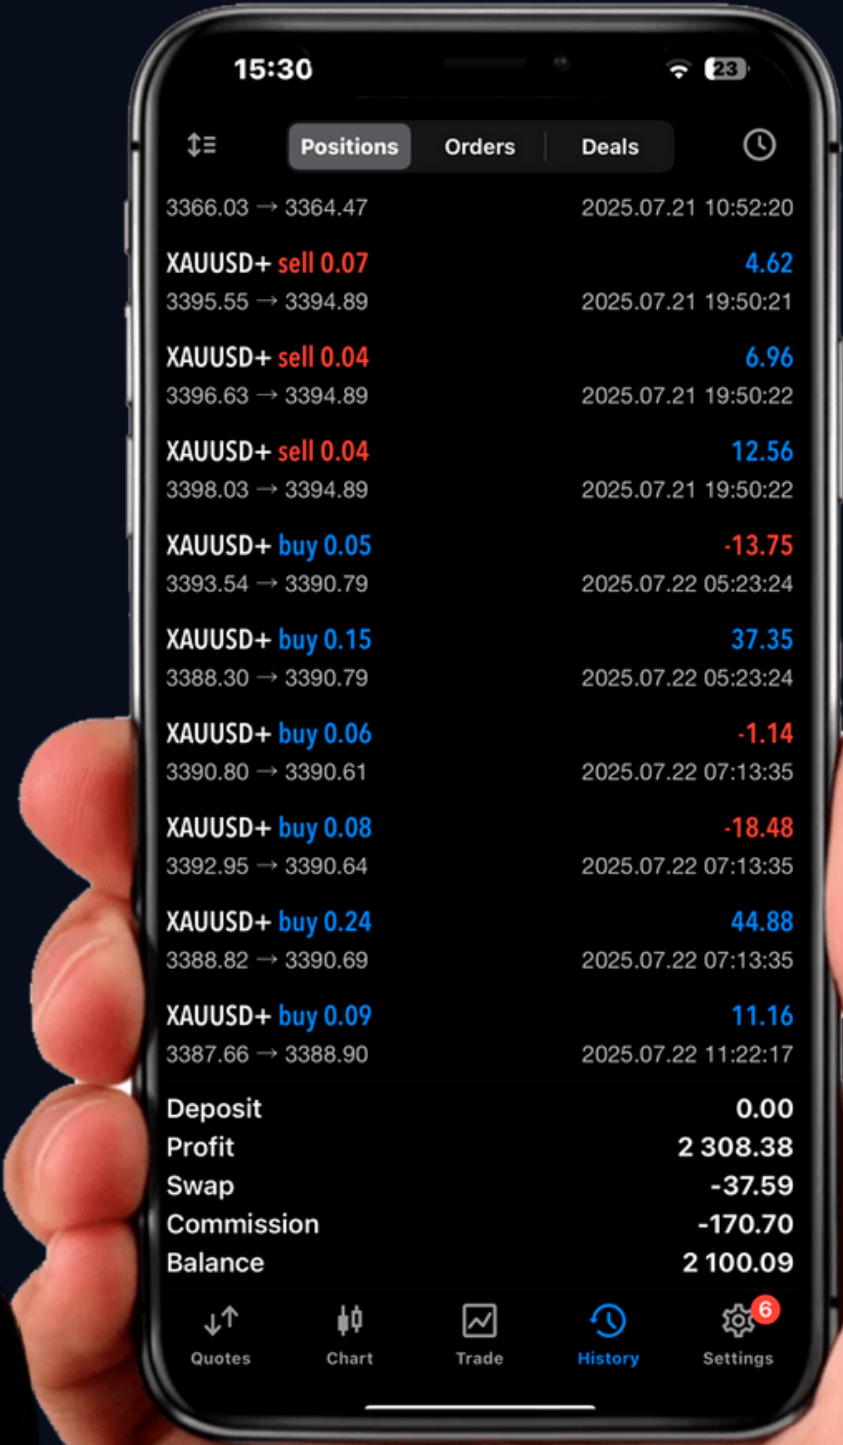

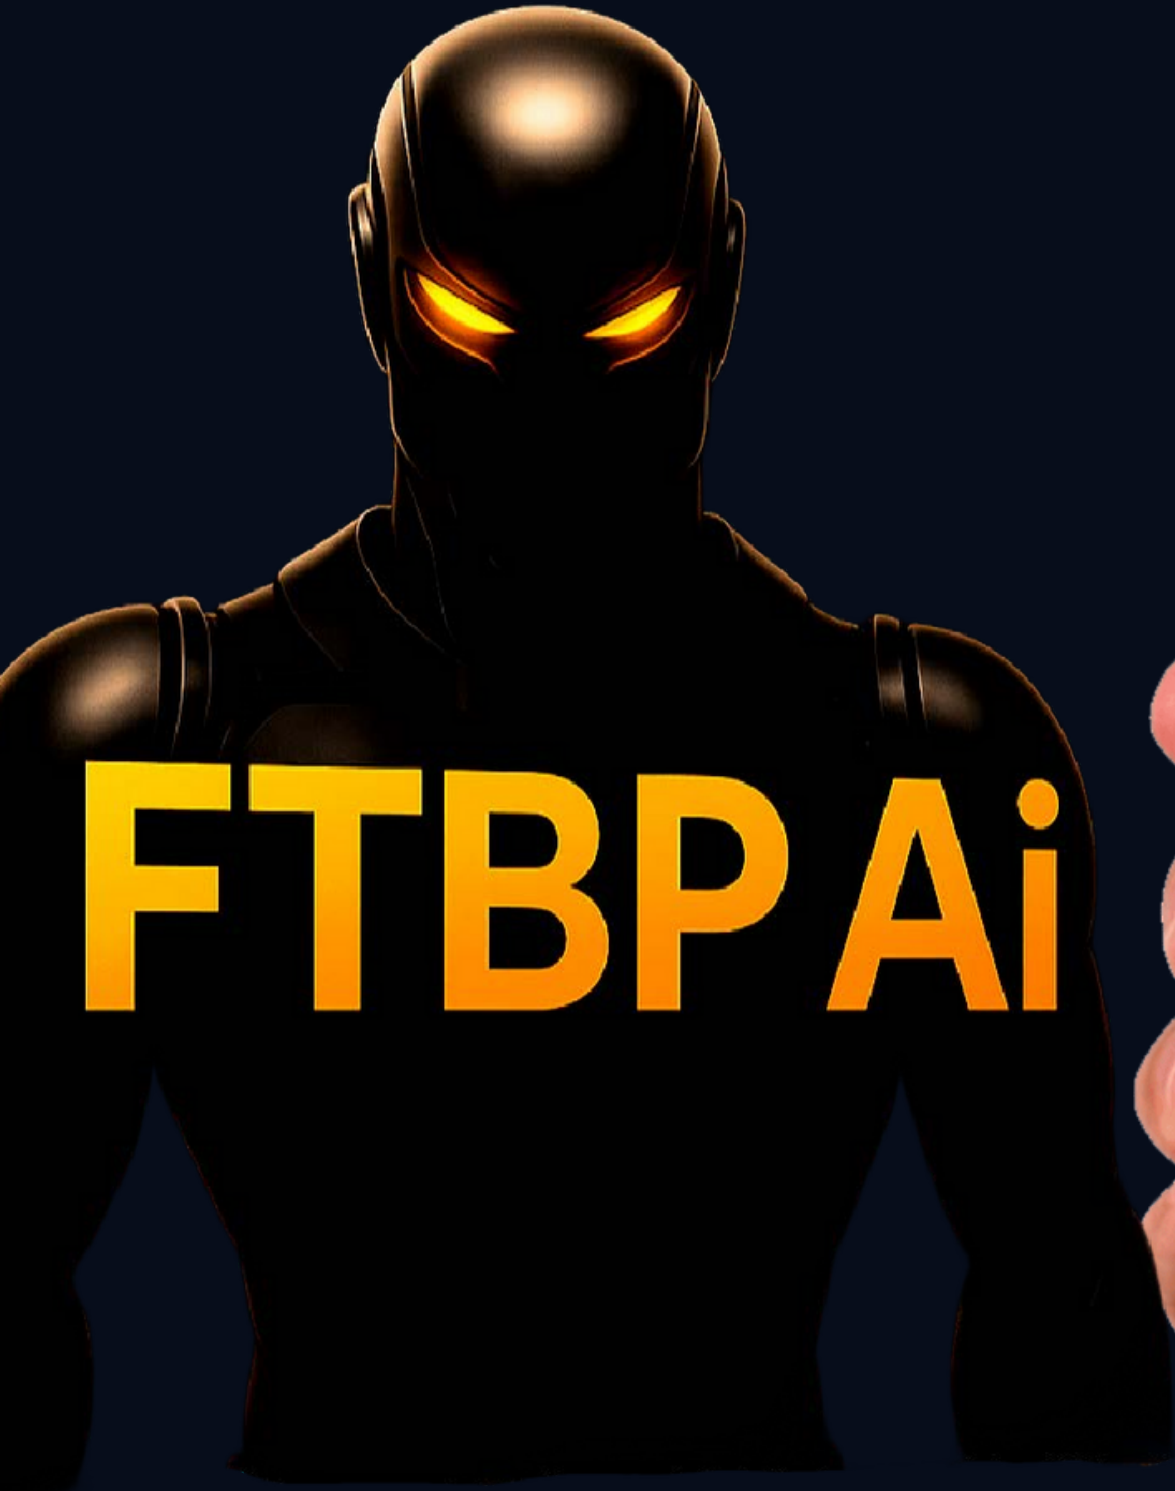

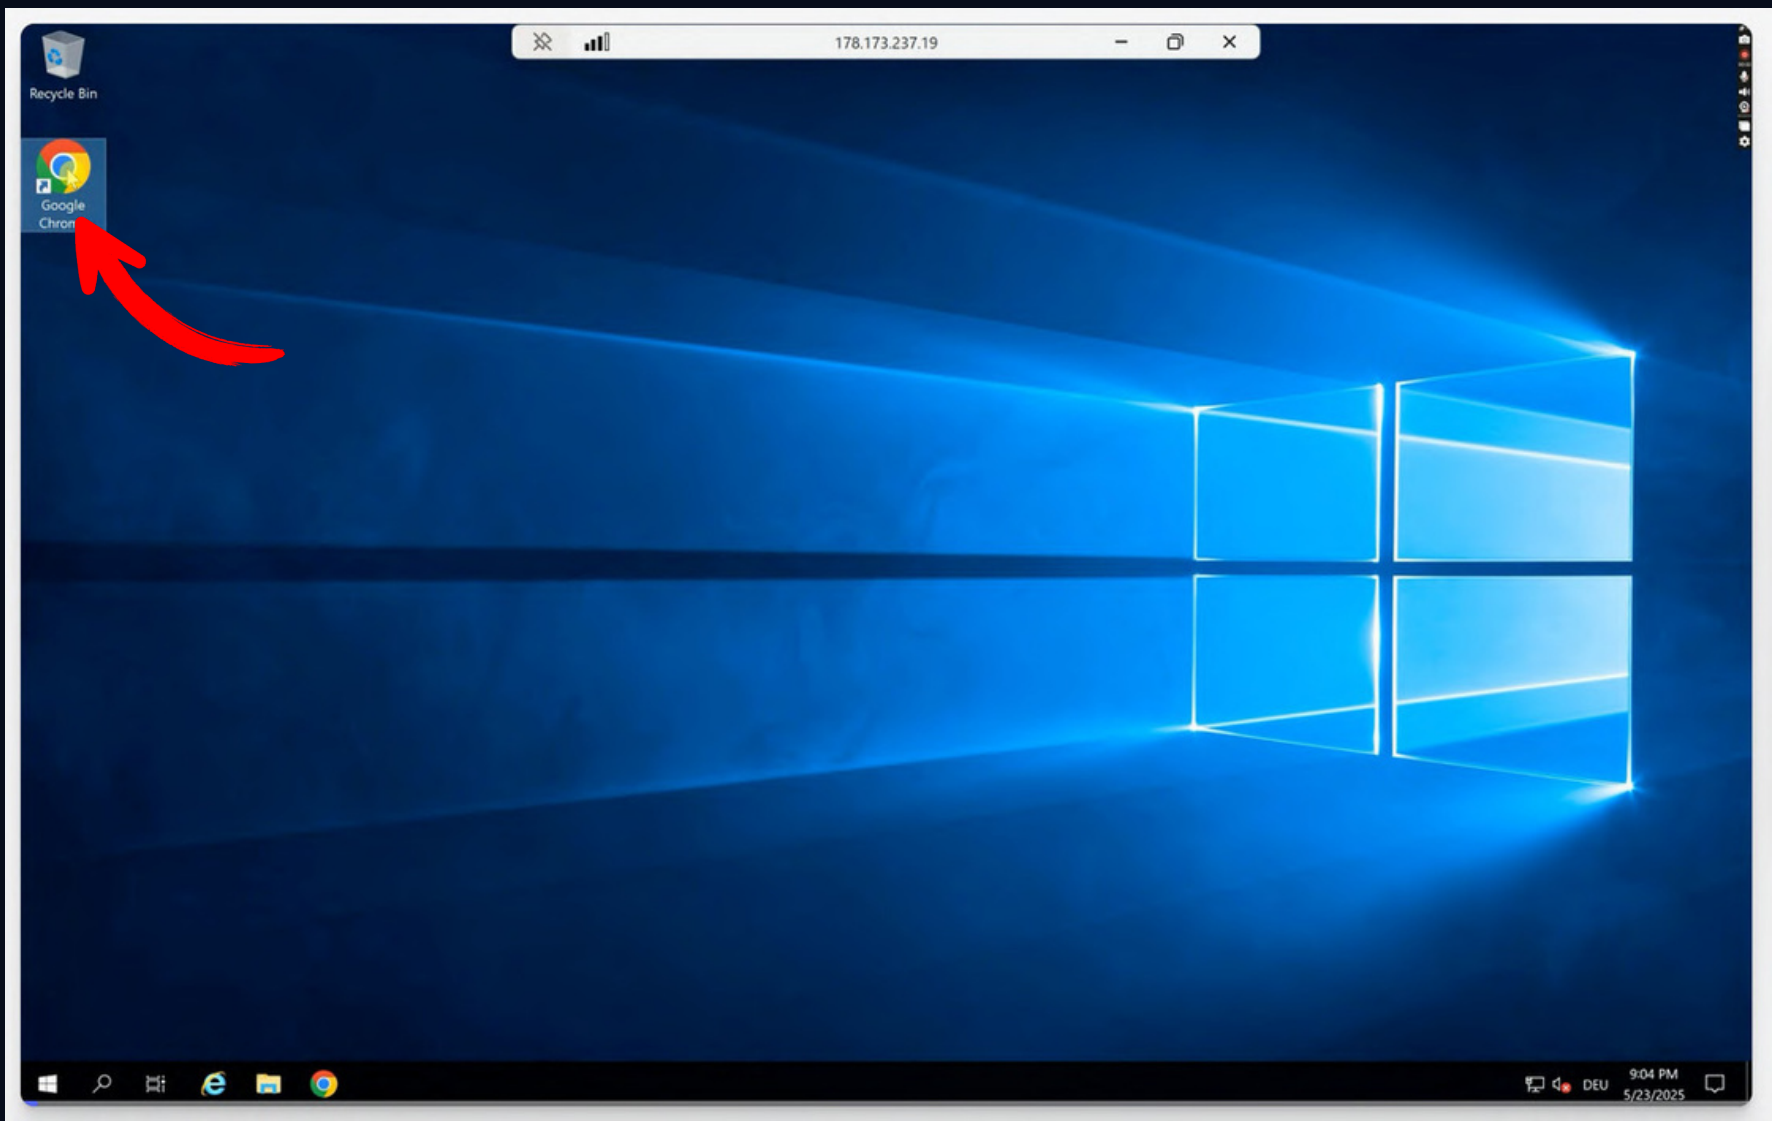

**Congrats! You've successfully logged into your VPS now!  
(Using a Windows computer/laptop)**

# STEP 3

## MT5 Terminal Installation FTBP AI V1.02

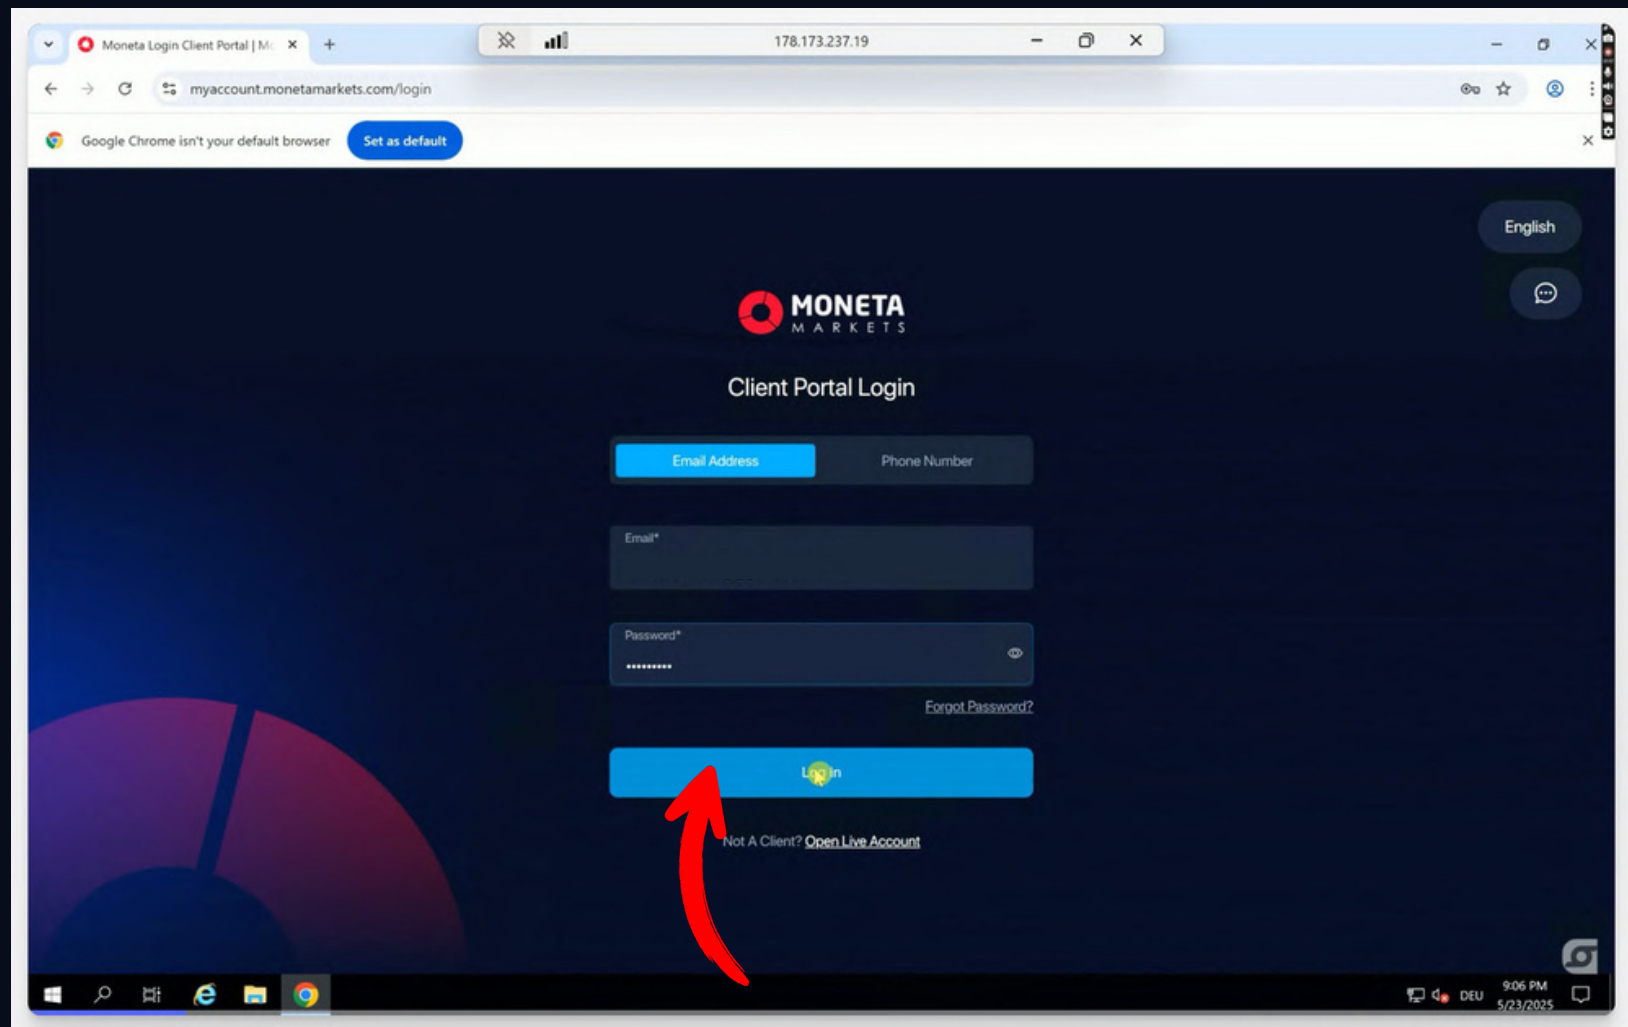

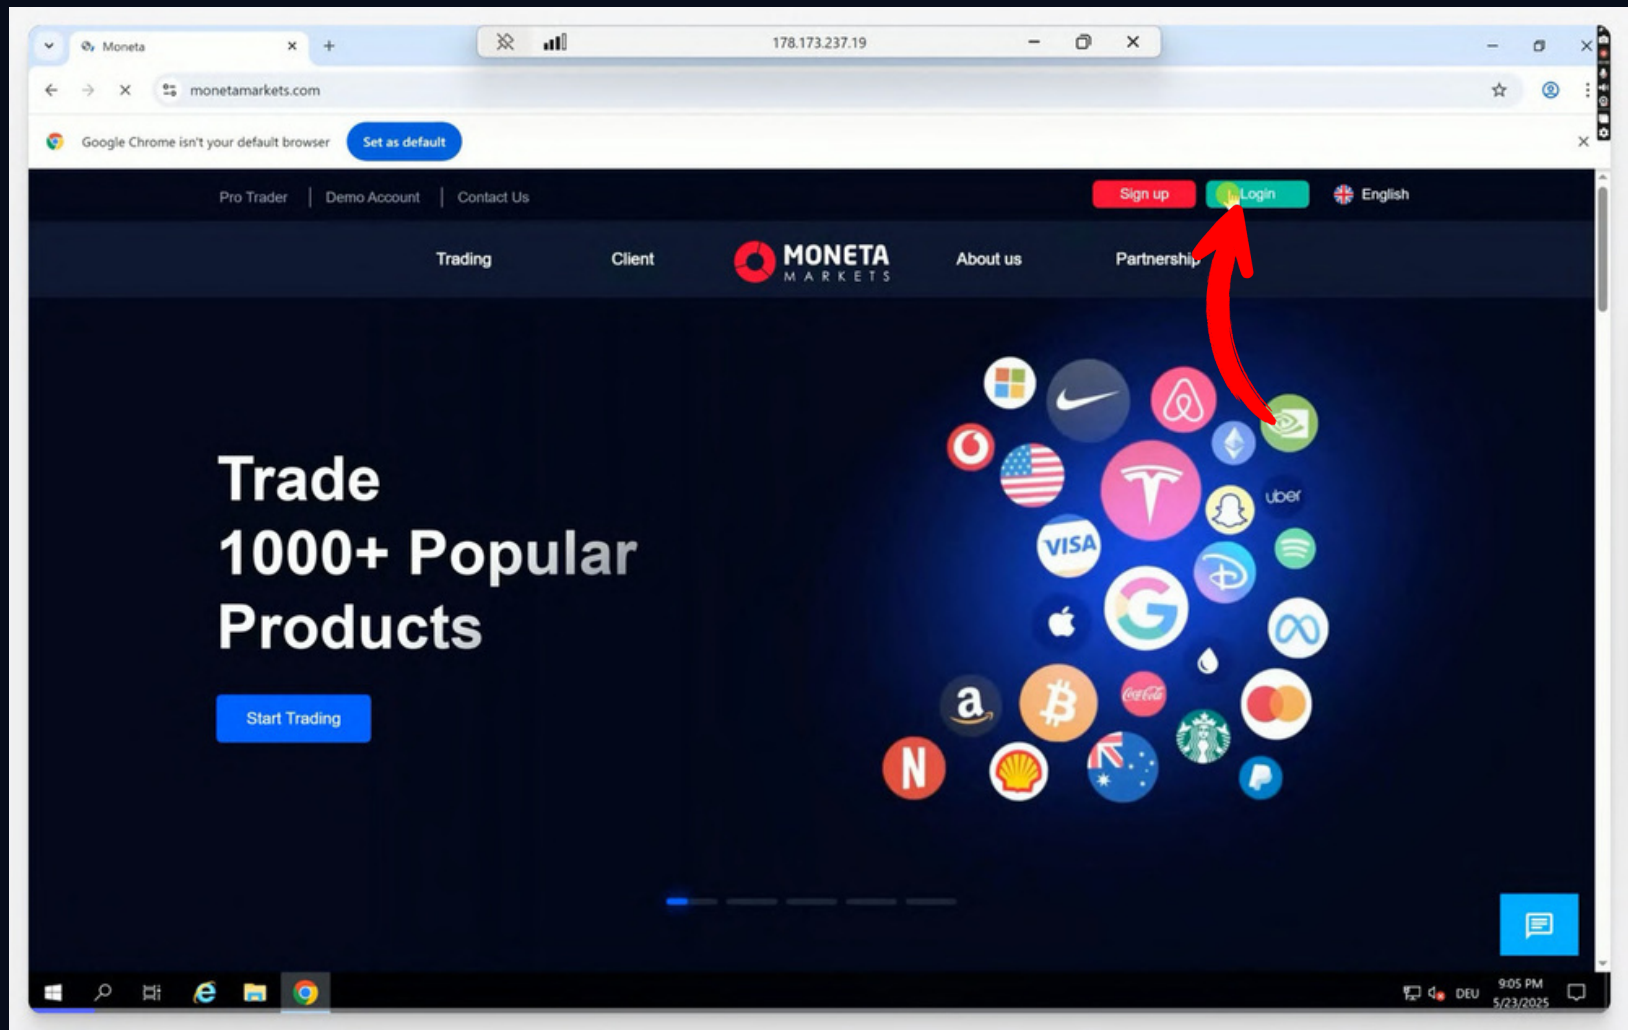

**In this section you will learn how to download the Meta Trader 5 terminal from Moneta Markets in your VPS and how to install the FTBP AI V1.02 on your trading account.**

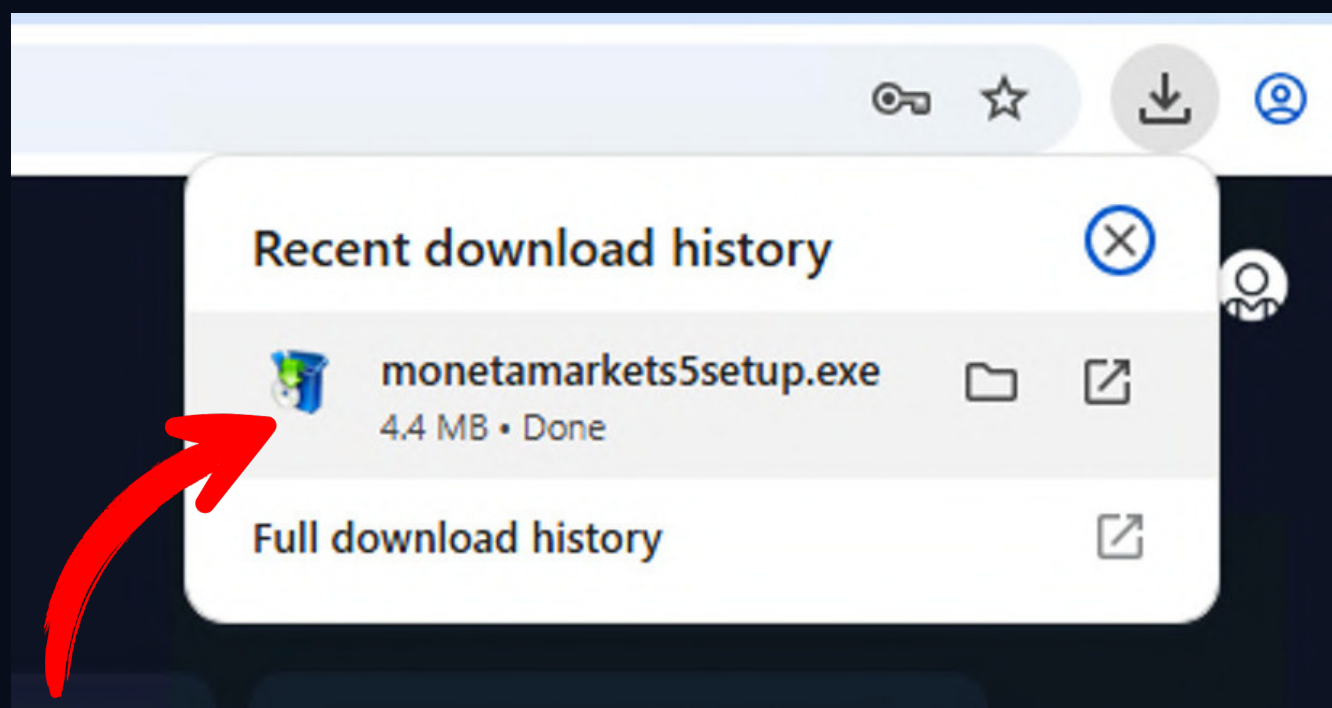

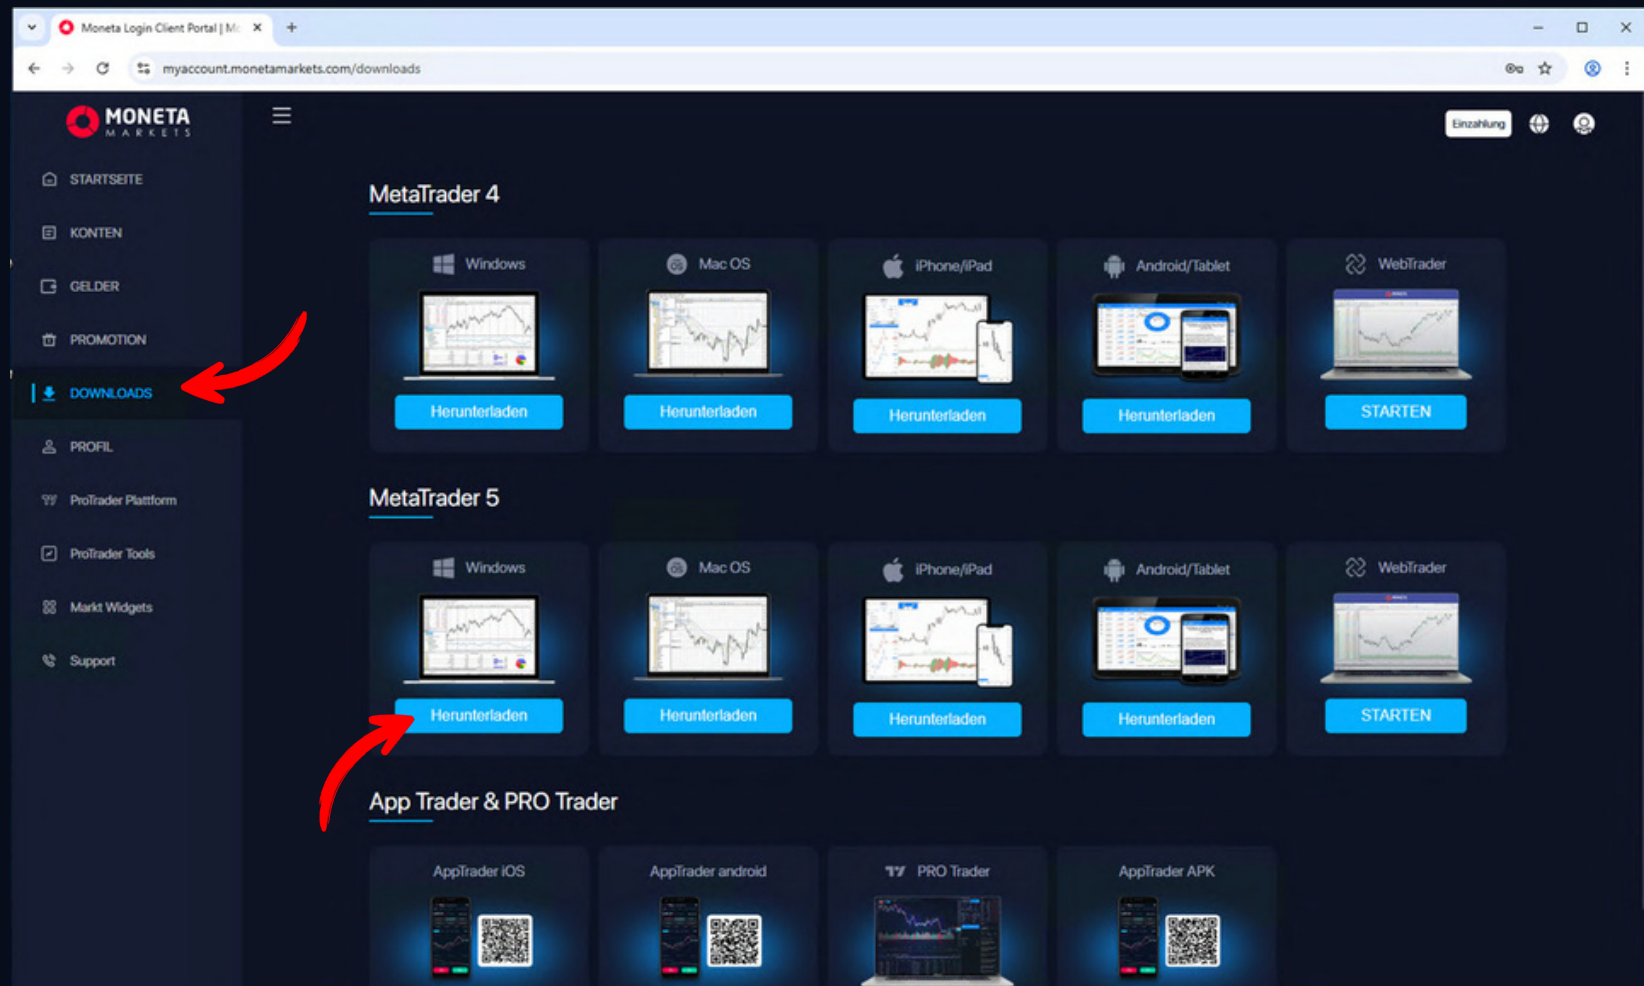

**Click on Google Chrome and go to: MonetaMarkets.com to log into your previously created account (within your VPS).**

Click on "Login".

Click on "DOWNLOADS" on the left side and then on "Download" for the MT5 Windows version.

Hi 

Your application for an additional account was successful. Details of the new account are listed below:

|                     |                                                                                     |
|---------------------|-------------------------------------------------------------------------------------|
| <b>MT5 Login</b>    | 15541290                                                                            |
| <b>MT5 Password</b> |  |
| <b>MT5 Server</b>   | Moneta Markets (Pty) Ltd                                                            |

Please download and install the **MT5** platform, then use the details above to log

← Antworten → Weiterleiten 

You need to enter the MT5 login details in the MT5 terminal that you received from Moneta Markets via email.

**Enter your login data and click "Finish".  
You should now be logged into your personal  
MT5 account.**

# You can close all open charts like EUR/USD, USD/CHF, GBP/USD, USD/JPY.

Now you'll get 3 files sent over from our Telegram Support.  
Download these 3 files.

You now have the files in the 'Downloads' folder.

Now go to 'File' in your MT5 terminal and then click on 'Open Data Folder'.

Symbols | Details | Trading | Ticks

Then drag and drop the newly added XAUUSD+ symbol into the gray area.

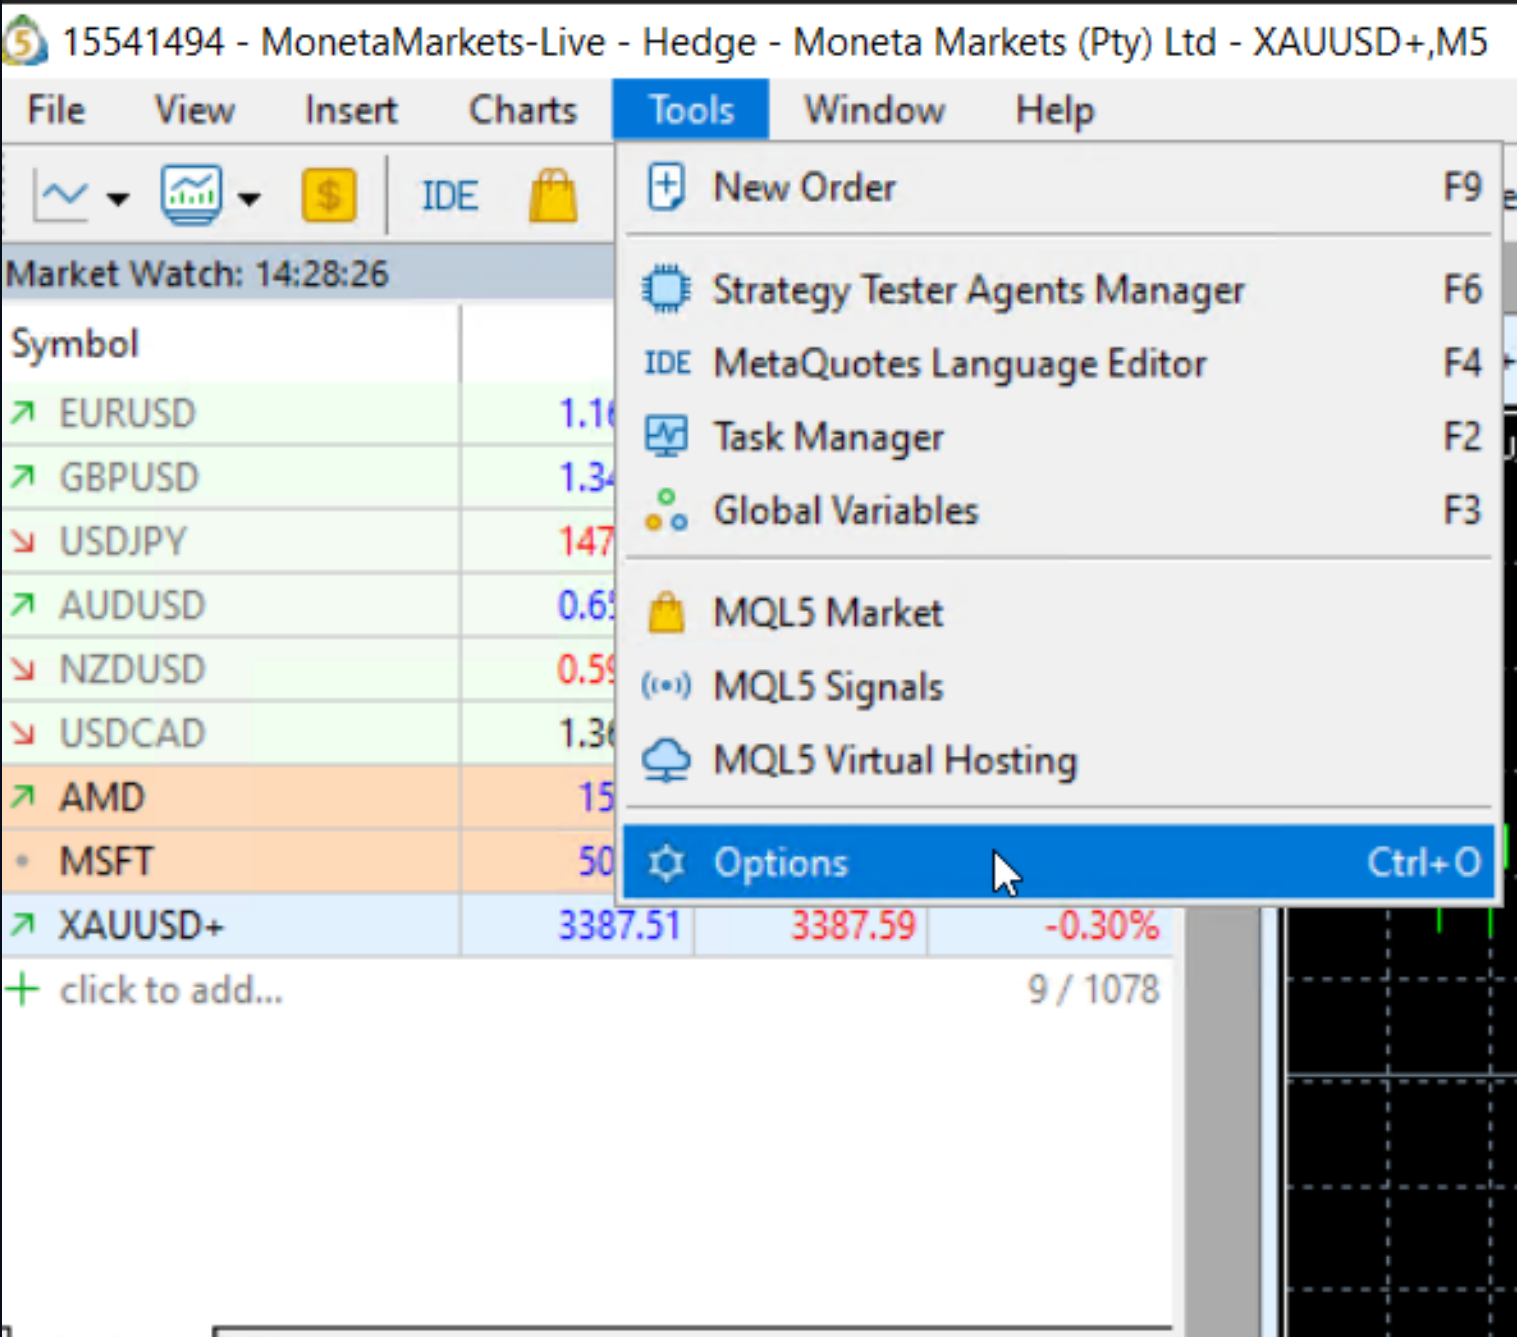

It is **EXTREMELY** important that you select the M5 (5 minute) chart !

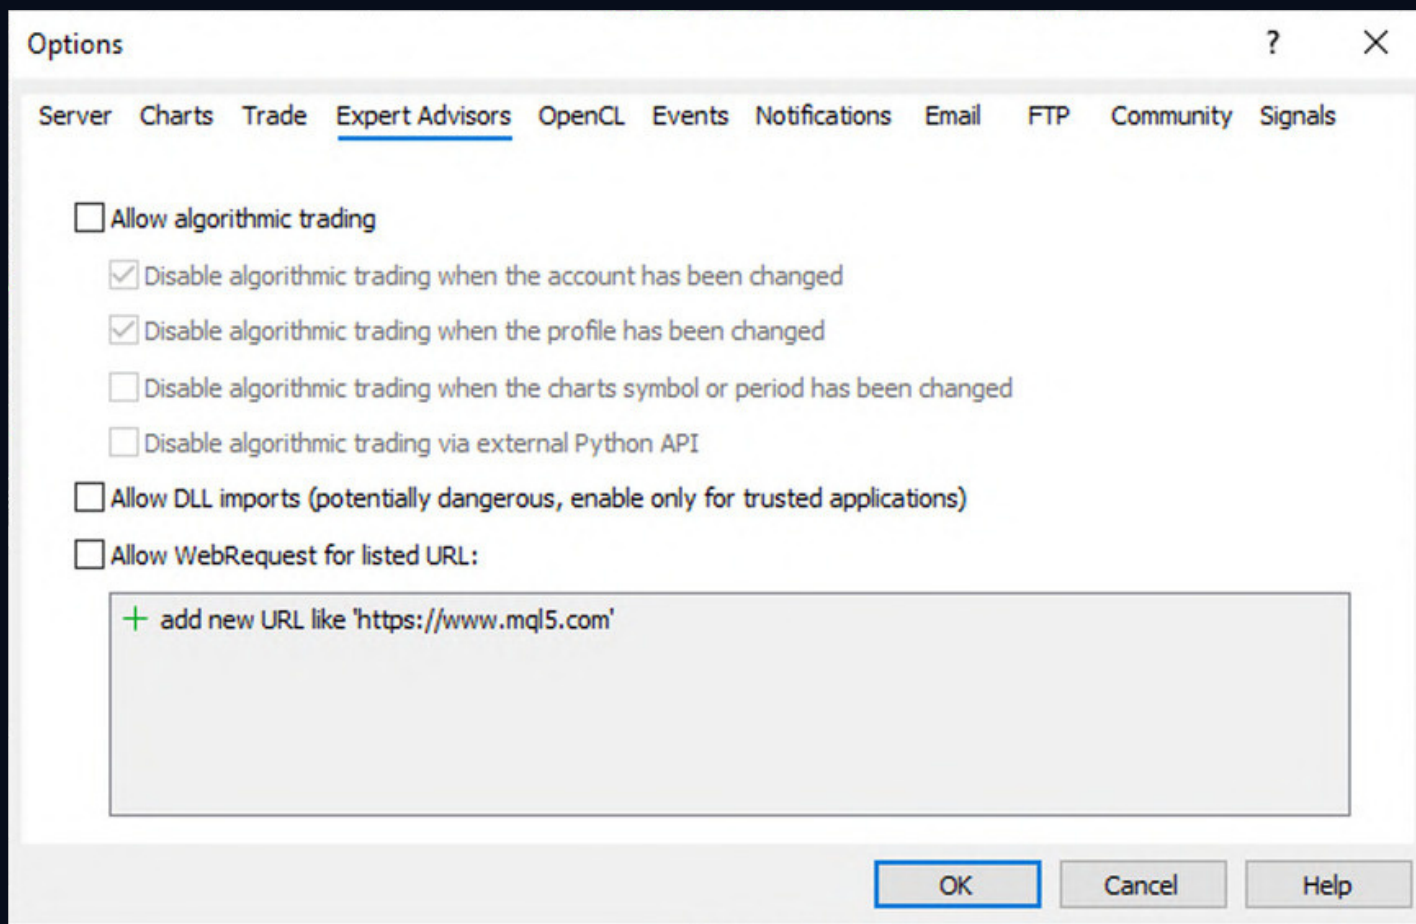

Make sure that XAUUSD+ is now selected on the M5 (5 minute) chart.

Now you need to make a few basic settings in the MT5 terminal.

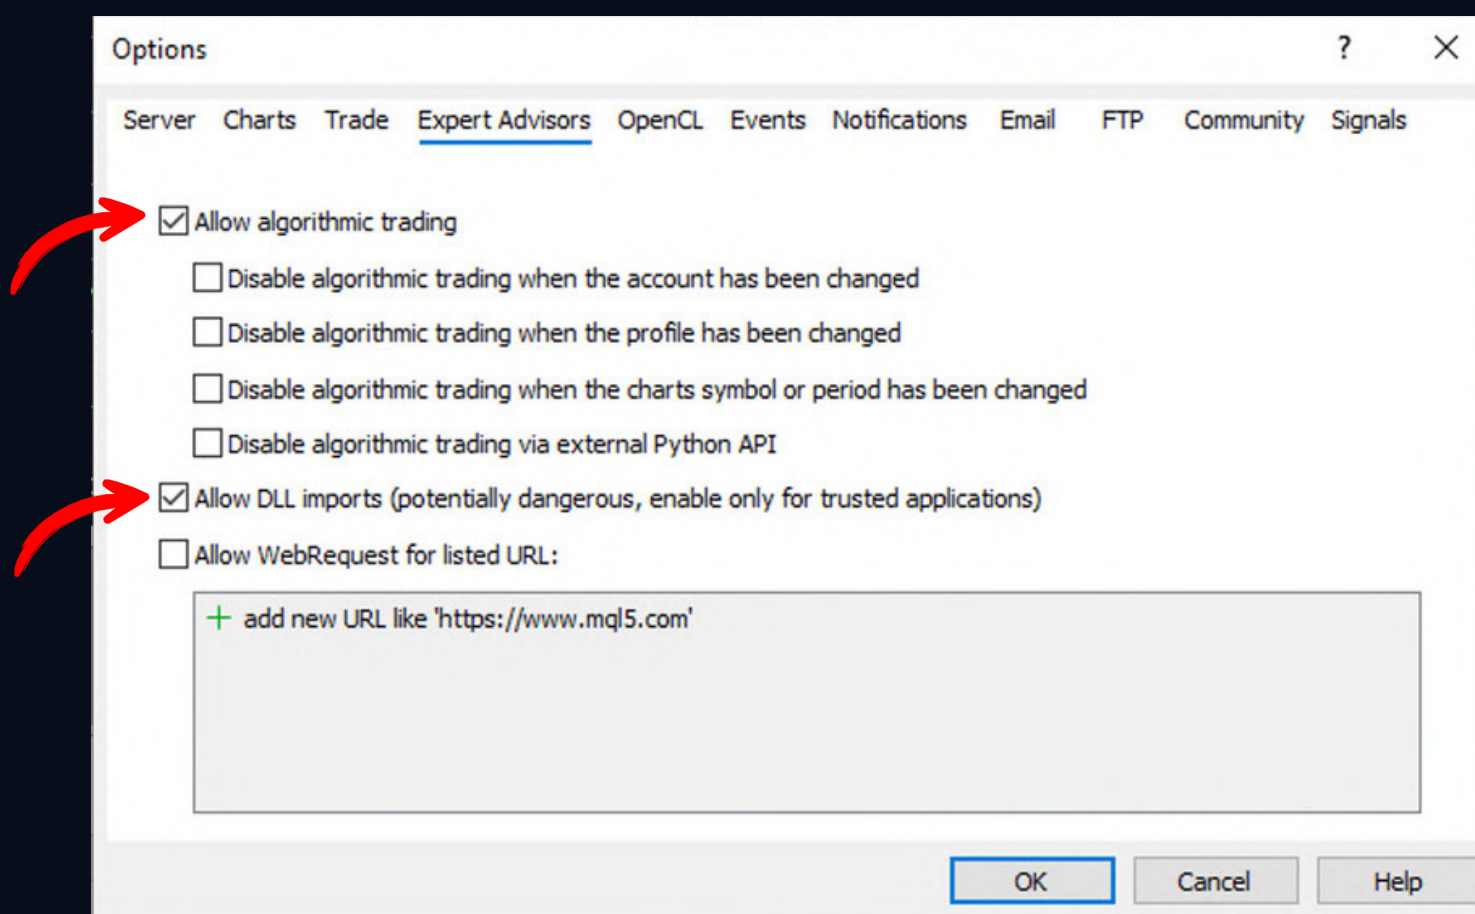

Go up to the bar on 'Tools' and then on 'Options'.

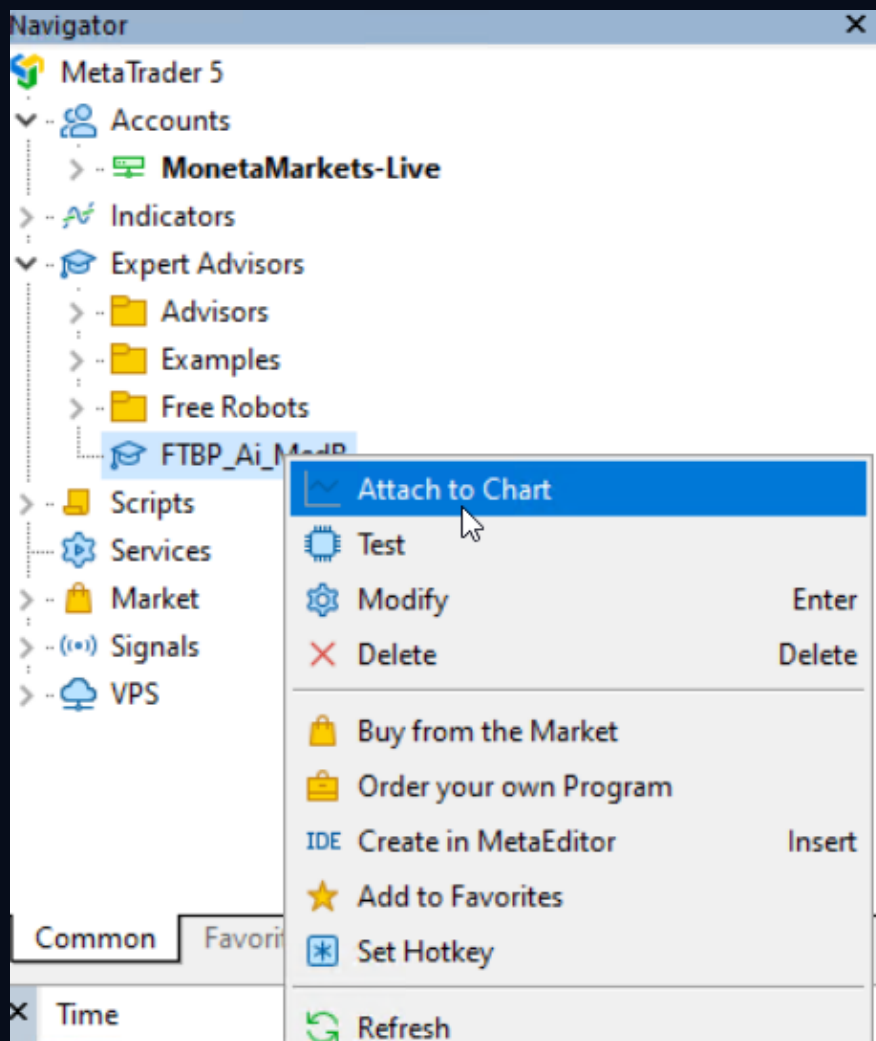

**Click on 'Expert Advisors' at the top of the bar**

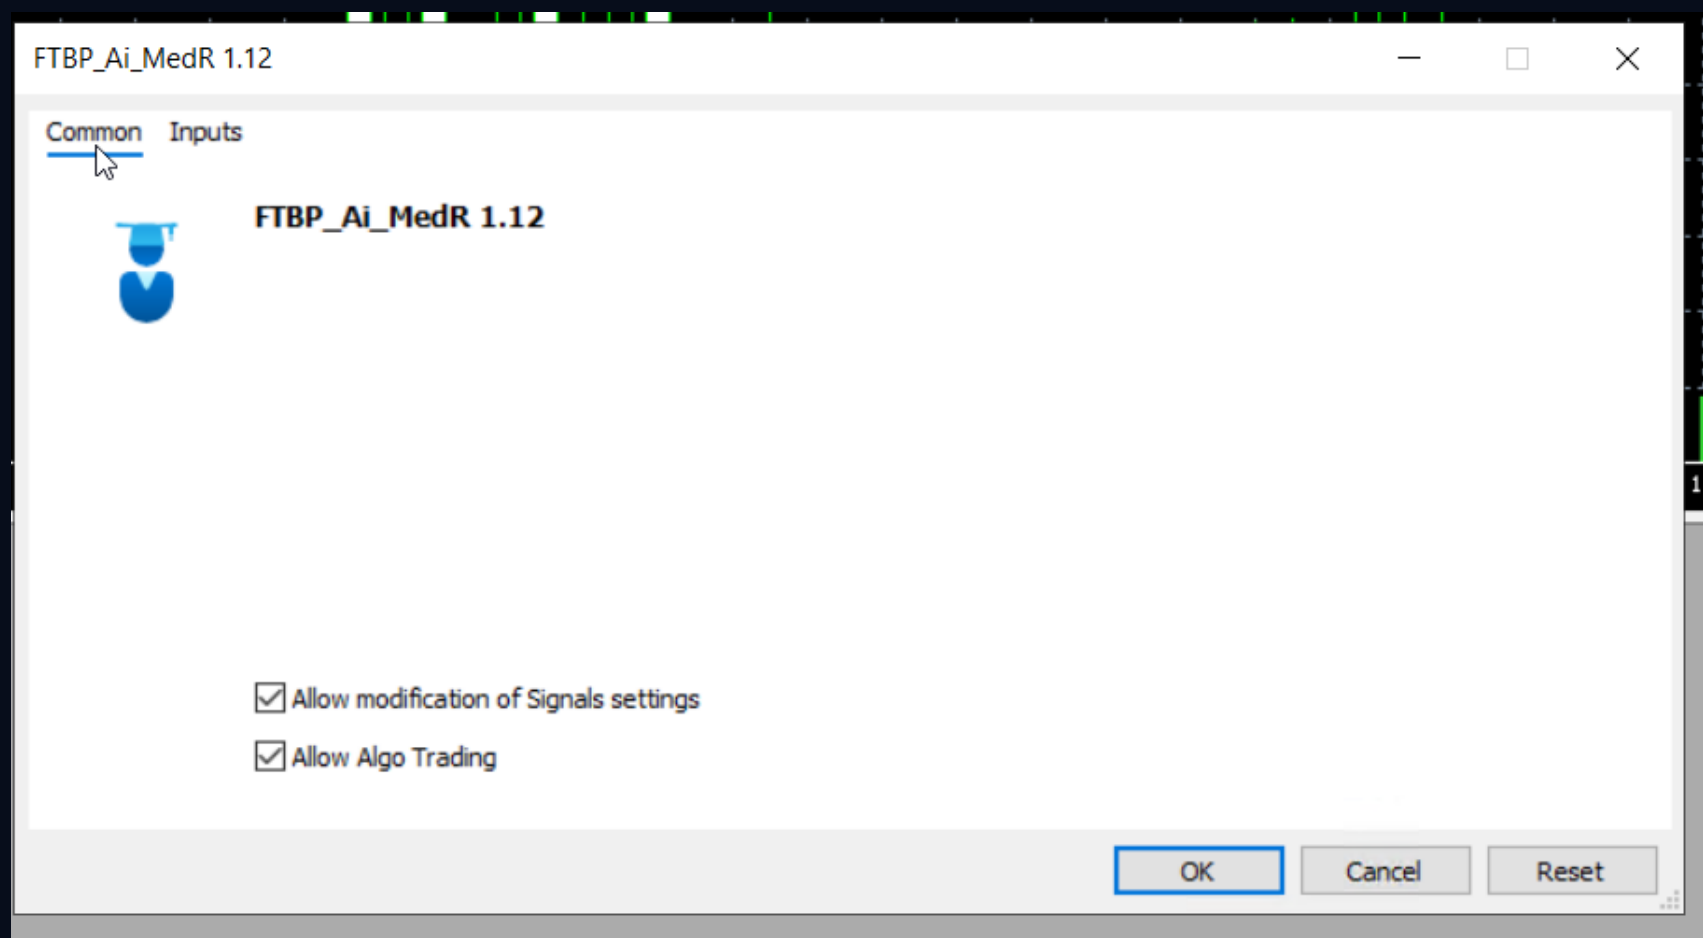

**Put the 2 checkmarks as shown in the screenshot below and click on 'OK'.**

Drag and drop the FTBP AI under 'Advisors' onto the XAUUSD+ M5 chart.

Check the boxes as shown in the screenshot and click OK.

## **BluePrint**

**Trading signals, copy-trading, and an automated trading robot for Forex/CFD are high-risk, leveraged products: you may lose your entire capital rapidly and, without negative-balance protection, incur losses exceeding your deposit; slippage, forced liquidations, and discrepancies between copied signals and actual results may occur. Past performance does not guarantee future results, and a substantial percentage of retail clients lose money. The content of this site does not constitute individual investment advice. Each client is solely responsible for their own trading decisions.**

# **Congratulations!**

The installation process is now complete!

Do you have any further questions?

**Our Telegram support is available at any time.**

**We are happy to help you with the setup if you need assistance.**
